Mach in Motion.

A quick look at what's moving at Mach—from custom samples to parts worth a closer look. Here's a little inspiration for your next project.

01 / WHAT'S MOVING

Our reliable scheduled release program helps customers secure high volume pricing and reliable supply chain without high up-front cost or urgent expediting activity. Never worry about long lead times again. We release based on your blanket order schedule up to 12 months out.

Schedule a time to talk to one of our sales engineers and find out if our scheduled release program is right for you.

02 / CUSTOM SAMPLE SPOTLIGHT

One sample.
A specific solution.

Sample Product

Industrial Animal Hair Shaver

Everyday at Mach Motion we're challenged with a new custom application from one of our customers. This custom DC motor was no exception. The customer needed a small dc motor that could fit inside their existing housing. High speed winding was performed to hit the customer's performance targets. Custom produced back plate and terminal design for easy installing inside their existing tool.

The result: A sample that turned into a 10 year production run for a successful product!

03 / FROM THE LINEUP

Worth a closer look.

Three starting points for your next design.

01

MBC034 front-mount brake

24 VDC / 1.68 N·m STATIC TORQUE

A power-off brake to consider for your motor assembly.

View brake specifications →

02

MZS planetary gearboxes

HELICAL / 60–140 mm / 3:1–100:1

Helical gearing and a one-piece square housing for high torque and stiffness.

Explore MZS gearboxes →

03

Custom frameless motors

CUSTOM WINDINGS / CUSTOM BUILDS

Start with the requirements for your frameless motor application.
